

Storyboard Overview

Welcome!

Username

Login >

Admin Login >

Once the application is invoked, the UI is initialized to: A login screen where the user enters his/her username into the box that says "Username." After a username is entered the user can either go directly to the Non-Admin subsystem or the Admin subsystem by clicking the appropriate button. After this window users can Logout/Safe Quit by clicking the buttons in the top right corner.

IMPORTANT: Throughout the storyboard boxes that can written in have a grey font. Boxes that are buttons have a grey background. Selected items in a list have a blue background.

Delete User

If the "Login" button is clicked it will lead the user to this screen. All the albums along with their details are presented in a list. There are three buttons below the list which present the options on what a user can do to the selected album in the list(open, delete, or rename it). Below those buttons exists a box where Users can create a new album by writing a new album name in the box and then clicking "Add Album." Users can go to the Album List Window by clicking the button that says "Go to Album List Window >"

[Copy Photo](#)

[Move Photo](#)

[Delete Photo](#)

[Delete Tag](#)

If a user clicks open album it will lead to this window. If there are no pictures in the album no thumbnails/photos will be displayed. A user can add a photo by clicking "Add Photo." Under the display picture there are three options. "Copy Photo" will present a popup that shows what albums the photo can be copied to. "Move Photo" will do the same except the photo won't stay in its current album. Delete Photo deletes the photo. If there's a caption for the display photo it will be shown in the "Enter Caption Here" box. Users can edit/add captions by directly clicking the box. Tags are displayed below the caption and users can delete the selected tag and/or add a tag by writing a Tag in the "Enter Tag" box and clicking "Add Tag." Users can have a manual slideshow by clicking the left arrow to go backwards in the album or the right arrow to go forward in the album. Users can go to the Album List Window by clicking the button that says "Go to Album List Window >"
